

Suction Catheters

A Suction Catheter is a device used to remove secretions from the oropharyngeal, nasopharyngeal and tracheobronchial tracts.

The catheters are part of a vacuum suction system, consisting of a vacuum pump or hospital pipeline system, with tubing to a receptacle to receive the secretions and tubing from the receptacle to the suction catheter.

Features:

- Thumb Tip or Finger Tip styles
- Two lateral eyes with smooth edges (refer to image)
- Atraumatic, soft rounded closed tip
- Non-kink tubing
- Graduated Lines
- Transparent
- Radiopaque line for x-ray
- Made of medical grade PVC
- Latex and DEHP free

Thumb Tip Style

| Style | Part Number | Fr Size | Colour | QTY |
|-------------------------------------------------------------------------------|-------------|---------|---------------------------------------------------------------------------------------|-----|
| Suction Catheter, 50cm, Thumb Tip Control Connector <u>without cap</u> | PH3312005 | Fr5 |  | 100 |
| | PH3312006 | Fr6 |  | 100 |
| | PH3312008 | Fr8 |  | 100 |
| | PH3312010 | Fr10 |  | 100 |
| | PH3312012 | Fr12 |  | 100 |
| | PH3312014 | Fr14 |  | 100 |
| | PH3312016 | Fr16 |  | 100 |
| | PH3312018 | Fr18 |  | 100 |
| | PH3312020 | Fr20 |  | 100 |

*Thumb Tip available with cap upon request.
