Company Profile

Founded in 1985, Parker Healthcare Pty Ltd is an Australian owned and operated medical supply company, with offices located in all main states of Australia and international offices in both New Zealand and Malaysia.

As a Quality Assured ISO 9001:2015 accredited company, Parker Healthcare supplies a diverse range of products that covers the neonatal through to adult divisions of the hospital. These segments include, but are not limited to; Anaesthesia and Respiratory Care, Infant and Paediatric Care, Maternity, Emergency and ICU.

Parker Healthcare have specialised divisions covering Hospital, Pharmacy, Aged Care, Veterinary and Home Healthcare, enabling the purchase and supply of products specific to these industries.

Parker Healthcare is committed to working towards continual improvement in the quality of care given to all patients. Through understanding our customers' needs and expectations this enables us to develop consumables and equipment to address the changing needs of both Australian and International healthcare.

Core Capabilities

- Own manufacturing facility in Malaysia (approx. 32,000 sq ft)
- Outstanding customer service
- Wide range of products
- Stringent quality control checks
- Highly experienced and trained workforce with over 35 years of industry experience
- Service Department for fast and local service & maintenance of goods
- ISO 9001:2015 Accredited

Mr. Ian Bird
Managing Director

Hospital   Aged Care   Pharmacy   Home Health   Veterinary   Dental

PORTER
NITROUS SYSTEMS
The Trusted Name In Nitrous
Suitable for use in Emergency Departments & Dental Practices

Flowmeter Connection Kit

MXR Continuous Flow Nitrous Oxide & Oxygen Systems

Gas-saving flowmeters, setting the standard for accuracy, performance and safety in hospitals and dental practices for the critical administration and regulation of nitrous oxide & oxygen.

Why MXR?
- Simple to use
- Precision, safety & patient comfort
- Multiple system configurations & accessories available
- No power required
- Manufactured in the USA

Features:
- Porter Flowmeter Tubes provide accurate, visual flow readings
- Dual Seal Fail-Safe automatically reduces and eliminates N_2O if O_2 is shut off or the pressure is reduced
- Gas Control Block virtually eliminates internal gas leaks. One-piece solid aluminium construction
- Gas Flow Adjustment Knobs allow quick, accurate, one-hand adjustment of gas flows
- Emergency Air Intake Valve automatically provides patient with ambient air if gas flow is interrupted
- Check Valve prevents rebreathing of used gases and guards against CO_2 build-up in the breathing bag
- Positive ON-OFF Switch on all models, eliminating the possibility of accidentally leaving the machine on
- Oxygen Flush Button provides an easily accessible override of all other gas flows and delivers 100%O_2
- Oxygen Quick Connect facilitates connection of resuscitation equipment to the central system
- Total Flow Adjustment Knob controls flow of both N_2O and O_2 at any desired concentration. Total flow can be adjusted without affecting concentration. Low flow capability means economy of operation.

QTube™ Breathing Circuits

The QTube™ Breathing Circuit primarily consists of a corrugated tube with an internally moulded panel effectively separating the inner tubing into two halves.

Specially moulded connectors complete the circuit allowing totally separate inspiratory and expiratory paths through the same tube. The purpose of this configuration is to reduce the weight and physical bulk associated with using two (2) separate tubes (inspiratory AND expiratory) in lieu of a single item.

Features:

- Strong yet portable, the risks of tube collapse, distortion and kinking are greatly diminished. Compact in size to free up work space for medical professionals.
- Reduced weight of up to 28% and 34% respectively compared to traditional 2 limbs and coaxial circuits, abbreviating users of unwanted drag and discomfort.
- Conforms to low and ultra low flow applications suitable from adults to paediatric users.
- Multipurpose circuit for complete patient categories reduces buffer stock in hospitals, materials, medical waste and is environment friendly.
- QTube™ bi-lumen septum design increases crush strength and pull force.
- An ideal compliance allows more targeted volume inspired each breath with minimal wastage.

GB3000

GB4000

Features:

- A high impact resistant plastic block coupled with a metal spatula provides great strength to the whole blade making it the strongest disposable blade available in the market. The strength is comparable to the all metal reusable blades and is useful in all kind of intubating procedures.

- Compatible to ISO 7376 Green standard.

- The plastic heel is clearly marked with the blade size relevant to each blade.

- The blades are made up of lightweight stainless steel.

- Two ball bearings are used for locking purpose. Not only do these provide secure fitting to compatible handles but also allow repeated application for the same patient or for testing.

- To prevent cross infection, the blades are clearly marked with the "single patient use" mark on the plastic heel.

- The blades are available in 5 MacIntosh, 7 Miller, 2 Kessell, 2 Robertshaw, 1 Seward and 2 Flexitip Mac Sizes.

NEW

PH-VL6000

The Parker video laryngoscope with HDMI function features a 2 megapixel camera offering high quality video and still images, while being easy to use and ergonomically designed to avoid injury during intubation of patients.

Large Screen

- 3.5 Inch full view
- Rotatable screen
- Frame rate 30 FPS
- Anti glare display
- LED screen in full colour

Snap button

- Take photos and video recording
- Integrated 4GB memory card
- Ergonomic handle design
- Anti-microbial handle

High Resolution CMOS Camera

- Anti-fog design with 6 LED lights
- CMOS camera chip
- 2.0 M Pixel
- Resolution ratio: 640 x 480RGB LCD screen
- 800 LUX LED illumination

Portable Design

- Recharge your video laryngoscope or upload your files
- Up to 150 minutes of working time
- USB & HDMI port available

Shown with reusable blade

Features:

- Unique Anti-Fog Capability (no need to wait for preheating)
- Lightweight with main unit less than 350 g
- Uses both reusable and disposable blades
- High capacity lithium battery
- Full view 3.5" screen designed to resist repeating wiping and wear and tear.

Technical Specifications

Parts	Parameter
Display	3.5" colour RGB 4:3 aspect ration screen at 30 frames per sec
Camera / Field of View	2.0 MegaPixels, 66°
Illumination	≥800 Lux
Battery	3.7V 3200mAh Rechargable Lithium Battery
Battery Charge and Lifetime Cycles	Charge time less than 8 hours, approximately 300 charging cycles
Charging Connector	Micro USB (5V at 1000mA)
Storage Environmental Conditions	-10C to 45C, 93% humidity, 500hPa to 1060hPa
Operationg Environmental	5C to 40C, 30% to 85% humidity, 700hPa to 1060hPa

Video Laryngoscope

PH-VLDM

Video Laryngoscope Monitor Set Incl; monitor, cable, reusable handle, 3pcs disposable blades.

When time is critical, make your go-to device the Parker VLDM.

Ideal for demanding OR, ED, and ICU setting, the VLDM provides a consistently clear view of the airway, and enhanced manoeuvrability enabling fast intubations. The VLDM system gives you a choice of 5 disposable blades to cover a wider range of patients, from infant to obese.

Add real-time recording and an onboard tutorial, and you'll see why the Parker VLDM is the one you go to for advanced video laryngoscopy.

VLDM = Advanced Airway Views

Features:
- Digital colour monitor with LCD quality resolution
- Reusable video laryngoscope with digital-resolution camera & disposable blades
- Innovative blade sizing, angulation, and camera positioning
- Reveal™ anti-fog feature, with a rapid heating profile to resist lens
- clouding and secretions

VLDM = Advanced User Features
- Integrated, real-time recording helps confirm tube placement and facilitate teaching
- Ergonomic design and rugged construction for multiple clinical applications
- Available in 5 disposable blade sizes, MAC 1, 2, 3, 4, 5

Applications
- First-use intubations, replacing direct laryngoscopy
- Normal or restricted oropharyngeal views
- Cormack-Lehane Graes I-IV laryngeal views
- Trauma airways - excellent when dealing with a blood and secretions in the airway
- Video-guided tube exchange in the ICU

PH-VL/Trolley

5 Leg Mobile Stand Trolley with Basket Only

System Components
- Digital, LCD quality colour monitor
- Reusable video laryngoscope with digital camera
- Disposable VLDM blade in a choice of 5 sizes
- Choice of mobile stand or IV pole mount

Page 23

Parker Sil-Flex™
Silicone Fixation Tape

Applications:
- Fragile / Sensitive Skin: Neonates to Geriatric patients.
- Suitable on damaged skin such as Dialysis, Chemotherapy and Radiography patients.
- All types of fixation e.g. IV, Cannula, Tubes, Electrodes etc.

Product Features:
- Excellent adhesive property, leaves no residue.
- Does not stick to hair.
- Waterproof.
- Suitable for Fragile / Sensitive Skin.
- Can be re-applied without losing the adhesiveness.
- **Patented design**, allowing you to tear to the desired length (perforated every 1cm) without compromising the tensile strength of the tape (no scissors required). (Applies only to PH-ST1519, PH-ST1525 & PH-ST5025)
- Transparent, soft and pliable, will not damage or disrupt any skin layers.
- Higher conforming property due to PU backing when compared to existing tapes.

**Does not stick to hair.**

Waterproof

Can also be used to hold down face mask to stop glasses fogging up

Twin-O-Vac Multi-purpose Suction / Oxygen Device

The Twin-O-Vac is a low cost versatile unit that is ideal when extra or portable sources of oxygen or suction are required. Each Twin-O-Vac uses one oxygen outlet (ie. An oxygen pipeline wall point or cylinder regulator) to provide variable suction plus two separate sources of oxygen. All three outlets can be used simultaneously on up to three different patients if necessary. The Twin-O-Vac can be connected or linked to an assortment of equipment including resuscitators, flowmeters, infant warmers and humidifiers.

Notes

Notes

TERMS AND CONDITIONS OF SALE

Parker Healthcare (ABN 43 006 420 364) hereafter known as "the Company".

1. All goods purchased in Australia, with the exception of Furniture and orders under $200.00 are delivered Free Into Store (F.I.S.) (unless otherwise agreed in writing). All goods purchased outside Australia, are supplied at ex-factory prices (unless otherwise agreed in writing).

2. All products delivered to On-sellers and Distributors are supplied at ex-Factory Melbourne prices (unless otherwise agreed in writing).

3. All risks in the products not delivered F.I.S., shall pass to the "Purchaser" when the product leaves the "Company" store and from that point, regardless of how delivery is affected, any insurance shall be the purchaser's responsibility. Please state Insurance Open Policy number on confirmation order.

4. All orders must meet the "Company's" minimum order value of $200.00. Any order under this limit will attract a "Minimum Order Fee" to the value of the difference between the order and $200.00.

5. Written quotations are firm for 30 days (unless otherwise stated) from date of writing except for material changes in exchange rates or increases in duty on imported products.

6. Verbal prices quoted are subject to change without notice and are recommended prices only.

7. All orders must be confirmed in writing.

8. All claims for short delivery will only be recognized if made in writing 48 hours from date of delivery.

9. The "Company" takes no responsibility for incorrect freight methods when freight details are not clearly advised at time of ordering and marked on the confirmation order.

10. Payment is strictly net 30 days from date of invoice unless otherwise arranged. It is the option of the "Company" to charge an interest fee of 18.0% p.a. on all amounts outstanding after 30 days.

11. Title to the products shall not pass to the "Purchaser" until the full invoice price has been received by the "Company". The "Purchaser" shall hold the products solely as bailee, returnable on demand, pending passing of title.

12. A Goods Return Authorisation Number must be requested from the "Company" prior to any item being returned for any reason. This number MUST accompany all documentation and all items returned to the "Company" Stores. The "Company" reserves the right to refuse acceptance of returned items not bearing this authorisation number.

13. A 20% minimum restocking charge will apply to all goods returned due to an ordering error by the "Purchaser". Freight on returned goods will be the responsibility of the "Purchaser". Goods held for more than seven (7) days from date of sale will not be accepted for return.

14. Goods supplied as a special make or a one off requirement will not be accepted for return under any circumstances.

15. An official "company" approval number must be quoted when requesting payment for any repairs carried out by an approved Repairer.

16. Disposable products are sold in box quantities.

17. Should a standing order be cancelled or reduced in any significant way, the "Company" reserves the right to recover the costs of any 'no charge' items previously delivered as part of the existing standing order arrangement.

18. Where a customer changes the requested delivery date of an order, payment for the goods is required to be made in accordance with the approved credit terms of the customer, using the original dispatch date as invoice date.
    Furthermore, if the goods are required to be stored for an extended period, the "Company" reserves the right to charge a holding fee .
